

# Your IT is at the Heart of Our Business

Sovereign is a business solutions provider which offers a fully integrated approach to transforming the way businesses operate, focusing upon making the people and the processes of a business more efficient and delivering technology to make them more effective.

As a trusted partner for both private and public sector organisations delivering tailored business solutions that address our clients' most complex and critical business challenges.

Through combining our expertise with service excellence and innovation, we will enable our clients to achieve their strategic goals and objectives towards a digital enterprise.

Business as usual doesn't bring opportunity - organisations need to be able to react quickly to change and Sovereign can help make it happen. Demonstrating a strong service offering of industry specific business and IT skills, we provide 24/7/365 support from our head office and primary data centre in north London.

## Consultancy

Technology is continually advancing and transforming the way you work. In order to get the very best out of these advancements, strategy and planning are integral and will provide your business with the necessary tools to excel within your industry and take full advantage of any opportunities. Sovereign's consultants are IT experts, with the sector experience and skills you need to help your projects succeed. All of our consultants possess extensive IT knowledge as standard. They have also all worked in their sectors of expertise, so they bring with them a deep understanding of the challenges your business is facing.

## Managed IT Services

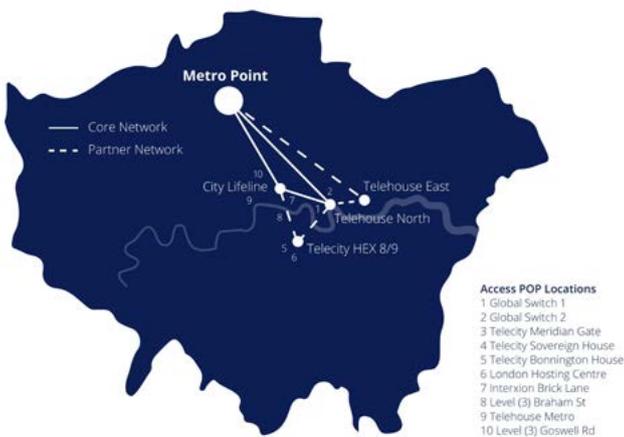

We have the expertise to manage and support your operational IT functions, whilst consistently delivering the highest levels of service. We work closely with you to fully understand your priorities giving you the confidence that we will deliver on time, every time. Our range of support includes implementation and ongoing support for:

- Software/hardware
- Cloud services
- Unified Communications
- Security hardware/software
- Hosted services
- Storage Area Network
- Penetration testing
- Mobile messaging

## Data Centre

The Tier III designed data centre is an ideal choice for businesses of any size. This state-of-the-art data centre is situated just 14 miles from central London, in an area chosen for its low risk profile and ease of access.

In addition, the facility has an advanced power and cooling infrastructure and a sophisticated management and monitoring system to ensure clients' systems are online and functional at all times. It is a secure facility certified to ISO27001:2013. The site benefits from proximity cards and CCTV throughout the building in addition to the 24/7 staff presence.

A well located data centre for UK and international clients; it is easily accessible via the London Underground and by road (10 minutes from the M25), but a reasonable distance from the centre of the capital, meaning that it meets even the most stringent disaster recovery and security standards.

## IT Solutions

Sovereign delivers secure, robust IT solutions that empower critical processes and help you achieve desired objectives. We work with businesses of all sizes from SMEs to large enterprises, creating business solutions that meet specific objectives and span multiple sectors.

You need tailored IT services aligned with your strategic goals. Your workforce is mobile, so connectivity and security are essential. Perhaps yours is a regulated industry, requiring specific compliance. Plus, you need disaster mitigation and scalability to accommodate growth. We tailor IT services around your business objectives and sector-specific criteria.

- Cloud
- Data Management
- Infrastructure
- Network & Security
- Procurement
- EML SaaS (Automotive Logistics Solution)

## Supporting Our Clients

Based in London, supporting clients and delivering IT solutions globally. The orange on the map highlights our presence across the World.
